

Installing *Digital Sim*

Basic Introduction

Pascal Pieper

Pascal.Pieper@dfki.de

Deutsches Forschungsinstitut
für Künstliche Intelligenz
Cyber-Physical Systems

These slides assume...

- Ubuntu 22.01 or some Windows¹
- Provided Digital.zip or from <https://github.com/hneemann/Digital/releases/tag/v0.29>
- Installed JDK ≥ 11 (`$ sudo apt install openjdk-11-jdk`)

¹Good luck with that, I neither use nor encourage this.

- Extract somewhere && cd somewhere/Digital
- Run it with *right click* on Digital.sh → *Run as Program*
 - For a permanent installation, run ./install.sh
- Read and click through the Tutorial
